

Bear Creek Parkway Extension

Environmental Issues

The Bear Creek Parkway SEIS will examine several environmental issues ...

Transportation

- Traffic Forecasts
- Operations & Connections
- Pedestrian, Bicycle, & Transit Facilities

Water Resources

- Potential effects to Sammamish River and Bear Creek
- Effects to Floodplains
- Protection of Water Quality

Air Quality and Noise Levels

- Ensure the project does not exceed state and local standards

Vegetation and Wildlife

- Heron Rookery
- Protected Plant & Animal Species
- Wetlands

Hazardous Materials

- Identify potential sources of contamination

Land Use and Zoning

- Ensure consistency with Redmond Comprehensive Plan and Downtown Redmond Transportation Master Plan

Aesthetics

- Views to and from new roadway

Recreation

- Open space
- Trails

Historic and Cultural Resources

- Archeological Sites
- Historic Resources

Public Services and Utilities

- Churches, Schools, Community Centers
- Emergency Services
- Electric, Telephones, & Natural Gas Utilities
